\$60 Million Jump In Insured Wages Push
Total to \$806 Million in Fiscal 1971

Jobs and Wages Increase in Most Groups

Highlighted by a \$16.8 million wage gain in trade industries, all seven industry groups shared in a \$60 million wage increase which brought wages paid to workers insured under Montana's Unemployment Insurance Law to a total of \$806 million in Fiscal 1971. The increase from the Fiscal 1969 total was \$102 million.

Trade Keeps No. One Spot in Jobs
and Wages

Wholesale and retail trade firms paid \$248.4 million in wages to an average 48,216 workers in 1971. There were 68 more trade employers in Fiscal 1971 and the number of workers increased by 766 from Fiscal 1970 totals.

Wage increases in other insured industries were in this order with Fiscal 1971 wage totals followed by increases from Fiscal 1970; Manufacturing, \$181.8 million, up \$12 million; Contract Construction, \$101.4 million, up \$11.8 million; Service Industries and Miscellaneous, \$83 mil-

lion, up \$9 million; Transportation, Communications, and Public Utilities, \$84.1 million, up \$5.3 million; Finance, Insurance and Real Estate, \$49.3 million, up \$3.6 million; and Mining, \$57.9 million, up \$1.9 million.

Mining was the only industry group to show decline in both the number of employers and wage earners during Fiscal 1971. Employer totals were down 25 and there were 205 less workers on mining payrolls. The manufacturing industry group lost one employer in Fiscal 1971, but the wage earner total was up by 208.

Average Yearly Earnings Up \$372

Average yearly earnings for all insured industries came to \$6,320 in Fiscal 1971, an increase of \$372 from Fiscal 1970. Construction workers topped the list with \$9,205 followed by Mining wages of \$9,047. Yearly wages in other industry groups were: Transportation, Communications and Public Utilities, \$7,803; Manufacturing, \$7,626; Finance, Insurance and Real Estate, \$6,489; Trade, \$5,152; and Service Industries, \$4,220.

(3) Employers whose operations are not ascribed to an individual county. Includes firms with unit or operations organized on a multi-county pattern and reporting as a single enterprise. Also included are some employers whose base operations shift from one location to another, such as construction contractors. During the Fiscal Years 1970 and 1971, approximately 50 of the larger employers who reported by unit were broken-out into the counties. This action increased the number of employers from fiscal 1969, and also decreased the multi-county employment and wages. The multi-county employers now represent only 7.4% of state total employment and 10.0% of total wages.

(4) Does not include employers who did not have employees during fiscal year. Employers are carried on Commission records until "none" reports have been received for two years.

County Wage Averages

Average earnings are derived from gross wages reported, divided by average number of employees on covered payrolls. Comparative figures for fiscal 1971 and 1970 appear below:
